

I feel that the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy Law protections.

Before Indiana's Privacy Law, we would receive several unwanted calls per week, now we only receive one or two per week.

I feel that we as citizens of this great country should be afforded the few hours in the evening and weekends that we have at home, to be our time to relax and not be bothered by all of the telephone solicitors.

Thank you,

Loren D. Myers
